

Hygienist Information.

Hygienist appointments are not available on the NHS.

We require prepayment for all hygienist appointments.

During a 30 minute appointment you will receive.

-  An introduction.
-  Instruction and personalised advice on cleaning.
-  Actual cleaning.
-  Advice on reattendance.

Surgery disinfection and instrument sterilisation also need to be incorporated into this time.

Occasionally the hygienist may be running late for unforeseen complications. You will still have all of your allocated time.

If you arrive late you still can be seen for a shorter appointment up to 15 minutes past your appointment time. We regret that beyond this there will be insufficient time for any form of treatment. Past this time £20 will be charged for the missed appointment. We are reasonable please keep us informed.

Some people require prolonged hygienist treatment or treatment that cannot be completed in one session. If you feel this of any other part of your treatment or estimate has not been adequately explained please inform the receptionist.

We hope to satisfy everyone of our patients and firmly believe hygienist treatment is a great way of ensuring dental health for life. We find that patients who regularly attend hygienist appointments require less dental intervention.
